

WE MAKE YOUR HOME A TRUE CUSTOM HOME

With your inspiration and our expertise, we will create a truly unique residence that you will be proud to call home.

We start with a clean slate, no cookie cutter templates, no cutting corners. That is not acceptable at Anchor Builders.

The initial design meetings are the most important in the entire build process and our Architectural Designer and Roy are there every step of the way... This is where the excitement really begins!

You will see your vision take shape as we develop your dream home, keeping the lines of communication open to make sure every detail, every nuance, is executed to your complete satisfaction.

Ideas come from many places . . . your camera, a magazine, the internet, and your imagination.

The following pages show the variety of custom plans we have created with the inspiration of our diverse clientele.

Important to this owner was size and function; not too big, not too small. The dining area was specifically designed for an inherited dining collection. Cozy and comfortable was our design goal.

Homesite with restrictions made this a bit of a challenge. The owner got just what they wanted including a Bonus Room that could flex into a 4th bedroom. The long pool created a fabulous view.

As a long time admirer of Anchor, this client was ecstatic when we were able to meet their budget for their first new home. They gave us a number of ideas to incorporate into their home, including a flexible bonus room.

This owner had amassed collectibles from around the world requiring a massive amount of uninterrupted wall space to accommodate oversized artwork. Accomplished while saving the beautiful views.

Two requests that were very important were the children's playroom and the VIP suite. Friends and family could stay in the VIP suite separate from the main house and the kids got their own space as well.

An innovation that makes perfect sense for today's 'empty-nester' owner is the laundry relocated to the Owners wing of the home. A formal dining room and a dedicated exercise room were owner requests.

A custom design with the owner's fingerprints all over it. Not being big fans of outdoor entertainment, they used that space on the interior, providing a unique gallery and second leisure space for the kids.

In this case, the owners brought us ideas from a plan found in the high desert of California! We were able to capture the intent of the original courtyard hacienda concept while adding the Florida flair.

Our true custom design expertise allowed us to serve the special requests of this owner. A prep kitchen was incorporated for the purpose of making chocolates. The multiple use Den met their needs as well.

Set in open wooded acreage, all the added glass openings give this home a window on nature in all directions. Dramatic ceiling effects add to the excitement of the design. A separate casita is a key point.

Working with a huge 'pie-shaped' homesite allowed us to design to the spectacular lake views from virtually every room. The 'special spaces' built into the design make this home a uniquely one-of-a-kind custom.

Rare but not extinct is the request for formal living and dining rooms. The leisure room is situated towards the rear of the home. Four ensuite bedrooms plus a bonus room gives room to roam.

Entertaining is the name of the game for this couple. The oversized bonus room allows for a full-size pool table. There are a separate exercise room and three ensuite bedrooms situated in a separate wing.

A spacious design with lots of owner influence. Our challenge was to fit everything on one floor on an irregular shaped site. Mom's requests included a walk-thru pantry and her own hobby room with kiln.

A family plan that centers around the children. They even have their own leisure room! The huge game room will serve them well far into the future with all the advancements in entertaining coming up.

Another formal living and dining room plan. The Owners bath features separate personal areas. Important to the owners was a dedicated music room. The ensuite at the rear of the home serves them well.

This couple knew they needed a big home for visiting family. Special areas to this couple are the music room, separate dining room, and an el fresco dining cabana. The owner's suite is secluded from guests.

Experienced owners with several personal builds in their past knew exactly what they wanted. Listening intently we were able to capture every nuance they wanted. This is a two-story home.
